

LAKSHMAN SINGH NAIK BHUKYA

+91-7093893482 – lakshmannaikbhukya17@gmail.com – linkedin/lakshmanbhukya – github/lakshmanbhukya

Career Objective

Computer Science undergraduate with hands-on experience in building Full-stack ready-to-use applications using modern technologies. Comfortable designing APIs, working with databases, and developing AI-powered and cloud-based systems. Focused on clean code and delivering end-to-end applications from idea to deployment.

Education

Prasad V. Potluri Siddhartha Institute of Technology	2024 – 2027
B.Tech in Computer Science and Engineering	CGPA: 8.75 / 10.0
Dr. B. R. A. G. M. R. Polytechnic	2021 – 2024
Diploma in Computer Engineering	CGPA: 9.1 / 10.0

Technical Skills

Languages: Java, SQL, JavaScript, Python
Backend: Spring Boot, Express.js
Frontend: React.js, HTML, CSS, Bootstrap, Tailwind CSS
AI & Cloud: RAG, MongoDB Atlas Vector Search, AWS (EC2, S3, Lambda, API Gateway, DynamoDB)
Databases: MongoDB Atlas, PostgreSQL, MySQL, Redis
DevOps & Tools: GitHub, Git, Docker, GitHub Actions, Postman, VS Code, IntelliJ, Eclipse

Projects

AtlasMind – AI-Powered Query Platform | React, Express, MongoDB, LLM | GitHub

- Built a full-stack web application that converts natural text and voice queries into optimized MongoDB queries in under 200ms using an LLM.
- Implemented few-shot RAG retrieval to supply contextually relevant query examples, significantly improving the accuracy of LLM-generated MQL queries.
- Applied strict guardrails to validate generated queries and prevent unauthorized data manipulation by restricting executions to read-only database operations.
- Designed a dynamic analytics playground that automatically renders interactive charts using Recharts based on LLM response payloads.

QuickLink – URL Shortener | React, Spring Boot, PostgreSQL, Redis | GitHub

- Developed full-stack URL Shortener that uses encoding mechanism to generate 6-character short URLs, supporting custom link aliases for authenticated users.
- Implemented QR code generation for shortened links, allowing users to instantly preview, download, and share links.
- Scheduled database cleanup using cron jobs to purge expired links and keep storage footprint minimal.
- Integrated caching to deliver sub-50ms redirect latency for frequently hit links, featuring a graceful fallback to DB Queries on cache misses.

Certifications

AWS Certified Cloud Practitioner (CLF-C02) – AWS	2026
AWS Generative AI Foundations – AWS Academy	2026
Spring Basics for Springboot – Infosys SpringBoard	2026
Database Management System – NPTEL	2025

Achievements

- Secured **1st Runner-Up** at Hack-N-Go, a national-level hackathon powered by TheSmartBridge and MongoDB, competing solo among 10,000+ participants to reach the top 10 finalists.
- Won **3rd Prize** in the "Tech Trivia" technical quiz competition.
- Finalist** in Odoo Hackathon 2025 for building **ReWear** – GitHub.
- Finalist** in 2-Fast-2-Hack 2025 for building **Threadly** – GitHub.

Technical Contributions

- Deployment Support:** Resolved environment configuration and secret management issues to prevent credential leaks, assisted in Docker image deployments, and reduced setup time by ~60%.
